 Osnova Škola Bilje, Croatia	Coordinator, Hadım Çok Programlı Anadolu Lisesi , Hadım, Turkey	 Jelgava District Correspondence School, Jelgova, Latvia

Project Financed by the European Union

PROJECT SUMMARY

In our world, in which there is no boundary and all nations go through a common life, education is an absolute necessity and re-quirement. With the development of the countries, the need for qualified workforce is increasing considerably both in our region and all over the world. Because of different reasons, students leave school early or they can't complete their education. Among these reasons are school-related problems, student's sourced-individual issues, environmental issues, eco-nomic issues. There are various studies for school attendance in EU countries. For exam-ple, the decline in the rate of early school leaving from 15 % to 10% is aimed in EU Commission's 2020 strategy. We aim to increase the participation of the students in academic activities, sports activities, and socio-cultural activities. Our project's background is based on identifying the students that tend to leave school early, providing all students with education in line with their own intelligence type and capabilities, make them realize and develop their potential and talents.

PROJECT MOBILITIES
